BIO / SKILLS

I am an art director and visual artist. My skills include creative direction, UX/UI design, working seamlessly with multidisciplinary talent like developers, animators & directors, creating and maintaining brand standards, designing pitches and proposals, leading creative teams, interfacing with vendors & production teams to ensure deadlines are met and developing, creating and launching brands. When I'm not working I enjoy playing and listening to music, viewing and collecting art and online shopping for mid-century furniture that I can't afford.
